BUILD IT STRONG

2021 LOOKBOOK

HIXWOOD METAL LLC

WE KNOW METAL

We love the outdoors and value hard work. We started Hixwood to supply the best post frame building materials you can get anywhere. Your building is where passion and purpose intersect.

It should look great, last a lifetime, and be a hassle-free process.

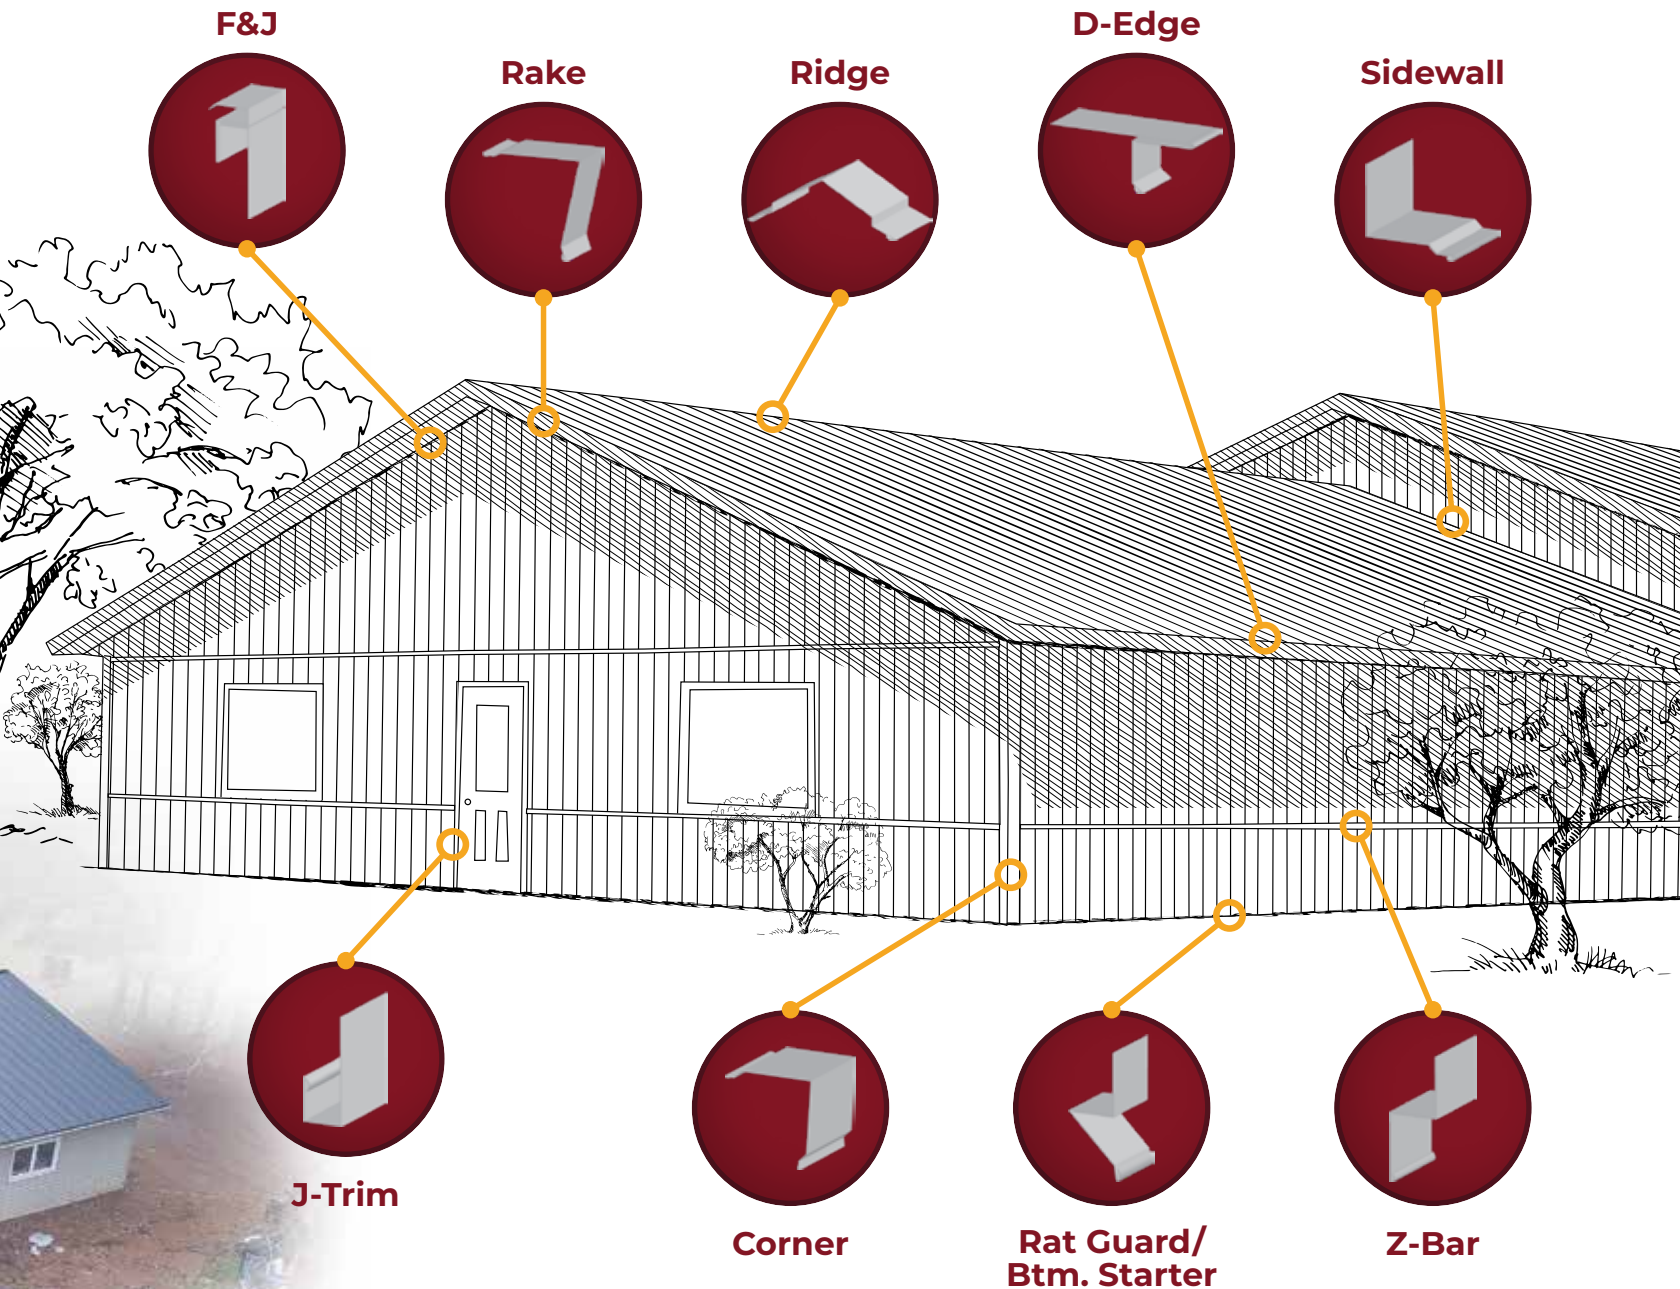

A post frame building is where work gets done and where your passion finds its home. It's where hunting stories are told and where the next generation learns to provide the things that really matter.

Some think it's just a building. We think it's a part of your story.

CONVERSIONS

1 Square = 33.34 Linear Feet

=

1 Panel at 33.34 feet long

How to Figure Screw Quantity

Total linear ft.
of the same color

×

2.5 screws
per LF

÷

250 screws
per Bag

=

Total bags

Example: 400 Linear feet x 2.5 = 1,000 Screws ÷ 250 = 4 Bags

Roof Metal Length Calculation

Roof Pitch Slope Factor

12/12 1.414

10/12 1.302

8/12 1.202

6/12 1.120

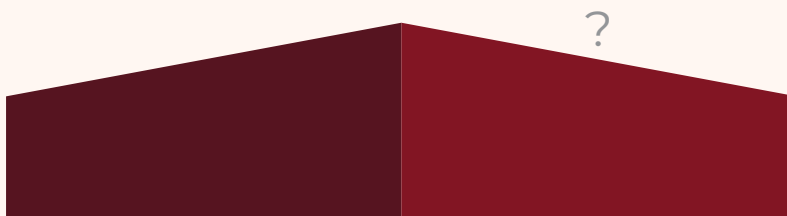

5/12 1.083

4/12 1.054

3/12 1.031

2/12 1.014

1/12 1.0035

Width

Slope
Factor

×

Width

=

Roof Panel Length

Example: 1.054 (4/12 pitch) x 20' Width = 21' Roof Panel Length
